

Topic - Lilliput Day

One day I woke up in my bed and everything looked so big. I thought it was my imagination, but when I woke up, it wasn't.

I was in my bed really small, everything was so Big! I was going to get down, but the bed was so high. I couldn't call my mom because she won't hear me or know where I was.

I went to the bathroom to brush my teeth. I couldn't brush my teeth with my usual one, so I brushed with my dollhouse brush. I went jumping down for my breakfast. It took a while for my mom to notice me. She asked what happened and I told her.

She said that I shouldn't go to the school and she would take me to the doctor after dropping my brother at preschool. I was sitting in my mom's pocket while going to the doctor. The doctor said that it was Smalliatis and it would last the whole day. She also said that I should watch out for things like when my mom is about to step on me. After I came home, I went outside. The grass was taller than me and I saw a ladybug that was bigger than me. I got really scared and went inside.

It was lunch time. I ate my favorite food - dose and maple syrup. The maple syrup looked like a big giant pool. Afterwards I stayed in the house looking at all the tiny bugs and I also learned how to speak their language. I was so interested that the time passed by.

My mom helped me with my homework. My brother came back from the preschool and he was a big pain because he pretended to step on me. Then he played with me by picking me up and putting me in his dump truck and driving me all over the house.

By that time my dad came home. He was really surprised on seeing me. It was already night. I started getting bigger and bigger every hour. We finished dinner and my dad read me a story till I fell asleep. The next day when I woke up, I was my correct size again. Everybody was very happy.
